

CASE STUDY

TUV UK HEADQUARTERS

Portsdown
Office Limited

Brief

TUV decided to consolidate their property portfolio from several buildings on a large out dated site to a single building.

Our Solutions

Through consultation using our 'Smart Working' process we developed a scheme that made best use of the space while maximising the team interaction and work flow.

Implementation

By using both 'fixed' and 'flexible' work place solutions we were able to fit all departments into the one area without the need to develop the site until later expansion was needed.
